Multilingual Document Example

This document demonstrates Docco's multi-language support capabilities.

Shared Content

This section is available in all languages and serves as common content across the document.

Language-Specific Sections

English Version

This is English-specific content that demonstrates language filtering.

Features:

- Multi-language support
- Language-tagged content blocks
- Automatic generation of separate files per language
- YAML frontmatter for language configuration

Use `<!-- lang:EN -->`...`<!-- /lang -->` to mark English-only content.

Conclusion

This multilingual document showcases how Docco enables content delivery in multiple languages from a single source file.
